

# CSCI 3308 Group Project:

Team 011-2

Team Name: Clock Blockers

Team Members:

Nolan Strauss: nolanstrauss

Micah Gagerman

Caroline Steely: email: [cast4115@colorado.edu](mailto:cast4115@colorado.edu) github: cysteely

Hayden Martin: HaydenMartin413

Charbel Adwan: Charbelmi

Tyler Paccione: Tylerpatch11

Application Name: TimeBridge Calendar

Application Description:

Event/scheduling planner - users can create, send, and manage invitations and RSVPs to events through our application. Overview page shows all users active events / calendar with events listed. Events can be shared between users by email/username. Unlike Google calendar, our product allows for users to manage invitations to events all within one interface.

Audience:

People that need to be more organized without an online calendar. Most likely people that have to organize their lives based on a schedule: ex: people who are employed or students. People that want access to quick scheduling and reminders, possibly more focused on short notice events.

Vision Statement:

The TimeBridge Calendar is an online calendar that allows for schedule collaboration For disorganized individuals, who lack a simple, elegant online calendar.

Version Control:

## Communication Plan:

Our group will communicate using a phone group chat along with a [discord](#) server to share our work and plans.

## Meeting Plan:

**Meeting with the group:** Our group will work together in recitation to communicate our weekly updates. We created a [when2meet](#) in case we feel the need to meet over zoom/in person during the process.

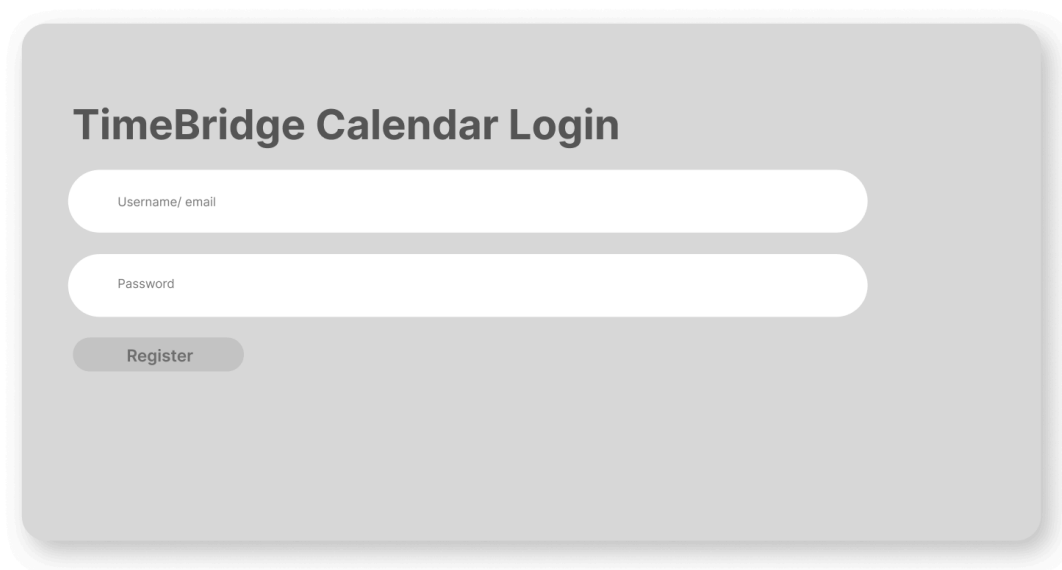

**Meeting with TA([Zoom Link](#)):** Our group will meet once a week at 4pm on Tuesdays to go over updates on our projects and what each member should do for the next week. We also have a group chat that we can communicate in regularly.
